This event brings together the GIM community to explore how social determinants drive the majority of our health outcomes and what the practice and research community can do to positively address social needs and, as a result, improve health outcomes.

Why

Promote your services and showcase your offerings. Discuss your position openings, fellowships, and programs of interest with attendees from throughout the country.

Network with:

More than 1,500 healthcare leaders including researchers, general internal medicine faculty and clinicians

More than 1,000 medical students, residents and fellows

Representatives from close to 400 academic medical centers, health systems, hospitals, medical schools, veterans’ centers and veteran systems

Association, government agency and private sector medical representatives

Networking is the most important benefit of the SGIM Annual Meeting and career advancement is attendees’ main focus.

Who We Are

The Society of General Internal Medicine is a member-based internal medical association of over 3,300 of the world’s leading academic general internists, who are dedicated to improving the access to care for all populations, eliminating healthcare disparities and enhancing medical education. The members of the Society advance the practice of medicine through their commitment to providing comprehensive, coordinated and cost-effective care to adults, educating the next generation of outstanding physicians, and conducting cutting-edge research to improve quality of care and clinical outcomes of all patients.

SGIM’s mission is to cultivate innovative educators, researchers, and clinicians in academic general internal medicine, leading the way to better health for everyone.
Exhibitors at SGIM19 reached their reported goals and secured prospects for fellowships and faculty positions.
