

## Patient-Centered Outcomes Research Session Series

### PCOR GENERAL SESSION

#### PCORIKN

Thursday, May 12

12:30 -1:30 PM

Diplomat Ballroom 5, CC 2nd Floor

#### **The Paradigm Shift: Patient-Centered and Patient-Engaged**

"Patient-centered" is not a new concept in primary care research, but that doesn't mean it's easy. By placing an increased focus on patient-centered outcomes research, PCORI has funded new innovative approaches on how to do this better. Join clinician-investigators and patient partners who are funded by PCORI and are learning how we can improve this vital area of research. Patient-centeredness represents an attitude shift, a paradigm shift, and a power shift, that can ultimately transform the healthcare system. The cornerstone of this transformation is patient engagement and stakeholder engagement, the topic of this PCORI-track general session.

**Session Coordinator:** *Jennifer L. Kraschnewski, MD, MPH, Assistant Professor of Medicine and Public Health, Penn State College of Medicine*

**Additional Faculty:** Christopher N. Sciamanna, MD, Professor of Medicine and Public Health, Penn State College of Medicine; Kara Odom Walker, MD, MPH, MSHS, Deputy Chief Science Officer in the Office of the Chief Science Officer, PCORI; Clarissa G. Hoover, MPH, Patient Partner, Family Voices, Inc.

### SESSION OBJECTIVES

- Define patient-centered research and how this differs from other types of research.
- Define patient-centered outcomes and how describe how they are identified.
- Understand the role of clinicians, clinician-educators, and clinician-investigators in participating in patient-centered research.
- Understand the role of patient partners in patient-centered research.

### WORKSHOPS

#### PCORWD

Thursday, May 12

1:30-3:00 pm

Room 301, Third Floor

#### **Building Patient Engagement from the Ground Up**

**Session Coordinator:** *Clarissa G. Hoover, MPH, Family Voices, Inc.*

**Additional Faculty:** Kathleen McTigue, MD, MPH, University of Pittsburgh; James Richter, MD, MA, Massachusetts General Hospital Gastroenterology; Courtney Clyatt, MA, MPH, PCORI; Jennifer Thomas, Youth Development Specialist, Institute for Educational Leadership and Patient Partner, Family Voices, Inc.

### SESSION OBJECTIVES

- Participants will be able to explain how building relationships provides a foundation for patient engagement.
- Participants will be able to describe several strategies for collecting ideas, insights, and feedback from priority communities.
- Participants will have identified priority communities and influential factors shaping engagement needs within their own practice or research.
- Participants will have identified next steps for advancing patient engagement within their own practice or research.

### **PCORWG**

Friday, May 13

10:00-11:30 am

Room 301, Third Floor

#### **Addressing Disparities through Patient-Centered Outcomes Research: How to Successfully Overcome Barriers to Participation**

**Session Coordinator:** *Irene Alexandraki, MD, MPH, Associate Professor, Florida State University College of Medicine*

**Additional Faculty:** Olveen Carrasquillo, MD, MPH, University of Miami Division of General Medicine; Carol Horowitz, MD, Icahn School of Medicine at Mt. Sinai; Crispin Goytia, Jenny Madlof, Patient Partners

### SESSION OBJECTIVES

- Discuss the barriers clinicians and patients experience in PCOR research as it relates to health disparities
- Compare and contrast strategies clinicians and patients have implemented to successfully overcome barriers in conducting PCOR in health disparities

### **PCORWJ**

Friday, May 13

1:15 – 2:45 pm

Room 301, Third Floor

#### **How Can Physician Networks like PCORnet Help Clinicians Participate in Research**

**Session Coordinator:** *Joan M. Neuner, MD, MPH, Associate Professor, Medical College of Wisconsin*

**Additional Faculty:** Russell Rothman, MD, MPP, Vanderbilt University Center for Health Services Research; Jennifer L. Kraschewski, MD, MPH, Penn State Hershey Medical Center

### SESSION OBJECTIVES:

- To introduce the PCORnet program and its strengths and opportunities for general internists interested in patient-centered research questions
- To provide an overview of observational studies and trials being performed with the PCORnet program
- To describe ongoing projects that involve generalist clinician-investigators and clinician-educators.
