INVIGORATE YOUR PRACTICE: Performance Improvement for Practice Redesign

SESSION SUMMARY
Technology has enhanced the capabilities of primary care practices. Examples are electronic records, population health management tools like disease registries, high risk case finding using big data analytics, and electronically enabled non-visit encounters. But the incorporation of these technologies into a standard primary care practice creates additional work demands on the care team that are often not offset by efficiency gains, and these stressors are major contributors to burnout.

Following a review of the impact of these technologies on ambulatory practice, participants will use a case-based format coupling brief didactics with group exercises to learn process improvement tools and techniques that can assist practices in incorporating these essential enabling technologies while maintaining a sustainable care model.

WHO SHOULD ATTEND?
- Those who want to advance their process improvement skills, whether they are currently beginning or intermediate.
- Those who want to see how to apply process improvement to a large project.
- Those who are interested in practice redesign. Teams are encouraged to take the course together.

COURSE FACULTY
- Nathan Spell, MD, Associate Dean, Education and Professional Development, Emory University School of Medicine
- Brent Petty, MD, Chair, Clinical Quality Improvement, P&T, Johns Hopkins University School of Medicine
- Alfred Burger, MD, Associate Program Director, Mount Sinai Beth Israel Department of Medicine
- Lisa M. Vinci, MD, MS, Medical Director, Primary Care Group, University of Chicago
- Richard Gitomer, MD, MBA, FACP, Director, Brigham and Women’s Primary Care Center of Excellence

LEARNING OBJECTIVES
- Describe ways that information technology enhances or threatens quality of care in the ambulatory setting.
- Analyze one’s practice to identify and prioritize opportunities for redesign.
- Apply process improvement techniques to practice redesign efforts.

Organized by the Quality and Patient Safety Subcommittee of SGIM Clinical Practice Committee.

WEDNESDAY, APRIL 11, 2018
8:00 am – 5:30 pm
Sheraton Denver Downtown | Denver, CO

One-Day Course Preceding the 2018 SGIM Annual Meeting
Registration Deadline: March 8, 2018

Registration Information
SGIM Full Members: $200
Trainees: $150
Non-Members: $250
