The Honorable Brett Guthrie  
Chairman  
Committee on Energy and Commerce  
U.S. House of Representatives  
Washington, DC 20515

The Honorable Frank Pallone  
Ranking Member  
Committee on Energy and Commerce  
U.S. House of Representatives  
Washington, DC 20515

Dear Chairman Guthrie and Ranking Member Pallone:

As your Committee pivots to other agenda items now that the House has completed initial action on the budget reconciliation bill, we urge you to prioritize consideration of a multi-year reauthorization for the Teaching Health Centers Graduate Medical Education (THCGME) program that includes the requisite funding increase necessitated by growth in the program to date and growth in the program envisioned by HRSA, including in your states of Kentucky and New Jersey, among others.

We remain profoundly grateful for the funding levels outlined in the reauthorization provision that was included in the Continuing Resolution last December. The compromise your Committee and the Senate HELP Committee reached represented a significant and meaningful step forward—one we deeply appreciate. At the same time, we have learned from HRSA program staff that the agency's anticipated needs for existing THC's and contingent approval programs exceed the annual appropriations levels in the compromise legislation. We would welcome the opportunity to meet with you and your staff to share more about why—despite being a generous and much-needed increase—the December, 2024 levels and the continuing resolution baseline still fall short of what is required to sustain and stabilize the THCGME program under HRSA's current implementation plans.

It is imperative that an effective THCGME funding solution be enacted by September, for both the currently funded grantees and the conditionally approved programs that started training new physicians this July, as their continued success is contingent on the timely availability of sufficient sustained funding. The THC program has over a decade of bipartisan support and is the only federal program investing in the training of future physicians in community settings, rather than hospitals. This funding is vital to the THC's fall recruiting process timeline and a lack of long-term appropriations creates uncertainty for THC's and medical students. Further, some THC's have either closed their residency programs or opted not to recruit their full authorized number 4<sup>th</sup> year medical students, further exacerbating the healthcare workforce crisis.

A multi-year extension that includes an increase in the per resident allocation will signal the marketplace, so to speak, that THC's should remain in operation and that medical students should rank highly THC's when selecting a residency program.

We look forward to collaborating with you as you turn to this and other vital programs that require prompt reauthorization.

Sincerely,
